

USER GUIDE

Vestmo All-Terrain Signals®

For investors seeking to improve their absolute and relative investment decisions

Overview:

- Obtaining an investment edge with rapidly changing market conditions can be challenging, expensive and time consuming for active and passive investors alike.
- The Vestmo All-Terrain Signals[™] were designed by a seasoned portfolio manager over decades to provide a cost-effective and flexible solution to meet investors varying investment objectives for a wide range of asset markets and conditions.
- With Vestmo All-Terrain Signals™, investors may gain a competitive edge by adapting to changing conditions and navigating market cycles; earning capital growth when a security is in positive trend/cycle and preserve capital when a security is in a negative trend/cycle.

How to Read the Vestmo's Signals Reports

U.S. Alternatives - Equity Factors and Themes

1	The markets to be analyzed
2	Alerts to a New V+ signal
3	V+ means the security is a relative to benchmark recommendation
4	Description of the index analyzed
5	Investable proxy - tradable security
6	Last price as date of report
7	Alert column provides the user a notification that a new signal was generated
8	View based on signal composite indicators BUY when GREEN SELL when RED
9	Score denotes the strengthen of the signal calculated by the breadth of composite indicators
10	Stop Loss provides the user a measure of risk control

4		4	5	6		8

		lpath.B S&P 500 VIX Short-Term Futures	VXX	\$15.00		Sell	100%	\$15.75

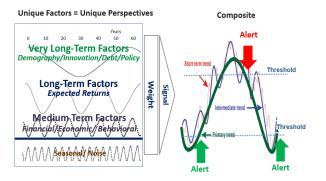

Vestmo All-Terrain Signals® Methodology and Use

Signal Methodology: The Vestmo All-Terrain signals are weekly generated by combining forward-looking factors into a composite score. The factors and weights are based on the user's objective and time frames. The composite score serves two purposes: a) determining if an asset is in a favorable or unfavorable market condition, and b) indicating the strength of that condition. When the composite score surpasses specific thresholds, a new signal is generated, signaling a change in conditions. The signal allows the user to systematically monitor for changing conditions for each asset either on a relative to a user selected benchmark or on an absolute basis.

Signal Flow Char	Buy = Green Sell = Re						
Key Questions:	Time Varying	Select Parameters	Composite				
Asset cheap/expensive?	Long - Term Factors	Expected Returns/Demographics/Debt	Sell				
Economic cycle good/bad?	Medium -Term Conditions	Liquidity/Financial/Economic Conditions	Buy				
Price behaving good/bad?	Short -Term Indicators	Seasons, Positioning, Price, Volume	Buy				
		Aggregate (Buy/Sell) & (Score)	Buy (62%)				

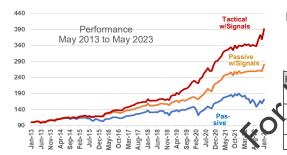

Create Alerts to Capture Upside Returns and Limit Downside

Reader should note that multi-asset, asset class, sector, country and market capitalization breakdowns indicate characteristics as of a point in time, may not be representative of current or future characteristics, and should not be viewed as an investment recommendation. As market conditions change, so will these allocations. The representative benchmark indices used in this report are described below:

- Multi-Asset Allocations are derived from Large Endowments Category (NACUBO) and Morgan Stanley Wealth Management Team among others.
- Global Equity Allocations are derived from MSCI All Country World Index (ACWI).
- US Equity Sector Model: S&P 500 Index.
- US Style Size Model : S&P 1500 Big/Med/Small Index
- US Style Growth/Value Model: S&P 1500 Pure Growth/ S&P 1500 Pure Value Index
- US Style Beta Model: S&P 500 Index, S&P Beta 100 Index & Low Volatility 100 Index
- Int'l Equity Index: MSCI EAFE Index
 Int'l Style: MSCI ACWI ex US Index
- Emerging Markets Index: MSCI Emerging Market Index
- Total Bond Market: Vanguard Total Market Index
- Duration Model: Total Bond Market Index Duration Components
- Credit Model: Total Bond Market Index Credit Quality Components
- Region Bond Model: Barclays Global Total Bond Market index
- Alternatives Model: Internally Equally Weighted
- Real Estate Model: MSCI US REITS Index via Vanguard REITS Factsheet
- Commodity Model: Bloomberg Commodity Index
- Alternative Strategies Model: HFRI Equally Weighted Index

Legal Notice and Important Disclosure Information

Vestmo Global Research, Inc. (the 'Publisher") is the publisher of the Vestmo Standard Report, a publication (the 'Newsletter"). The Publisher is **not** registered as an investment advisor with any federal or state regulatory agency. Rather, Publisher relies upon the "publisher's exclusion" from the definition of "investment advisor" as provided under Section 202(a)(11) of the Investment Advisers Act of 1940 and corresponding state securities laws. The *Newsletter* is a bona fide publication of general and regular circulation offering impersonalized investment-related advice to subscribers and/or prospective subscribers (e.g., not tailored to the specific investment portfolio or needs of current and/or prospective subscribers).

The publication of the *Newsletter* should not be construed by any subscriber and/or prospective subscriber as Publisher's (i) solicitation to effect, or attempt to effect transactions in securities, or (ii) provision of any investment related advice or services tailored to any particular individual's financial situation or investment objective(s).

Subscribers **do not** receive investment advisory, investment supervisory or investment management services, nor the initial or ongoing review or monitoring of the subscriber's individual investment portfolio or individual particular needs. Therefore, no subscriber should assume that his/her/its subscription serves as a substitute for individual personalized advice from an investment professional of the subscriber's choosing.

The subscriber maintains absolute discretion as to whether or not to follow any portion of the *Newsletter* content. Publisher does **not** offer or provide investment implementation services, **nor** does it offer or provide initial or ongoing individual personalized advice. It remains the subscriber's exclusive responsibility to review and evaluate the content and to determine whether to accept or reject any recommendation and to correspondingly determine whether any such recommendation is appropriate for a subscriber's investment portfolio or strategy (of which Publisher has and expresses no knowledge or opinion). Publisher expresses no opinion as to whether any of recommendations contained on the *Newsletter* are appropriate for a subscriber's investment portfolio, strategy, financial situation, or investment objective(s).

The Vestmo Smart Signals performance data provided herein (i) were prepared by the Publisher, based on a hypothetical trading account and not based on actual trading of securities; and (ii) include results that were back-tested and derived from the retroactive application of the Vestmo Smart Signals model which was developed with the benefit of hindsight and does not reflect the impact that certain economic and market factors might have had on actual decision-making process basis. No hypothetical, back-tested or simulated performance can completely account for the impact of financial risk in actual performance. Hypothetical back-tested performance results are based, in part, on hypothetical assumptions made for modeling purposes that may not be realized in the actual management of indices or trading of securities. Benchmarks are provided for illustrative purposes only. Comparisons to benchmarks have limitations because benchmarks have volatility and other material characteristics that differ from the Vestmo Smart Signals. Because of these differences, benchmarks should not be relied upon as an accurate measure of comparison. Any past performance referred to in the *Newsletter* may not be indicative of future results. Any opinions contained in the *Newsletter* reflect the Publisher's judgment exclusively as of that particular date. Therefore, no current or prospective subscriber should assume that the future performance of any specific investment or investment strategy will be suitable or profitable for a subscriber's portfolio, or equal historical, hypothetical or anticipated performance levels.
